# Pond Safety & Maintenance Guidelines

## General:

- ★ Please provide adult supervision during all activities
- ★ No mud fights
- ★ Please DO NOT climb on the waterfall, the rocks are loose and could fall on a finger or toe.
- ★ If you use the fire pit on the grass, please place a board under it to protect the grass.
- ★ Please be careful and considerate of others-This is a neighborhood, not a public facility.
- ★ Jumping off the bridge is okay.

## Boats:

- ★ Do not run into other boats or other objects.
- ★ Don't bang paddles on the boat or other things.
- ★ Move out from under the zip line quickly.
- ★ Please drain paddle boat periodically to keep it from swamping.
- ★ Please DO NOT sink the boats.
- ★ Please bring all boats back to the West shore when finished. Please drain them & tether to stakes on shore.
- ★ Please do not leave canoes all the way up on the grass. The sun will heat the bottom and burn the grass.
- ★ Please do not pull the boats onto the shore where rocks are as it tears the bottoms

## Blob:

- ★ ALWAYS make sure all is clear and person at end is ready before jumping
- ★ Do not allow small children to climb on blob under the bridge.
- ★ Be mindful of the weight of launcher vs. person on end. Large people shouldn't be launching small children.

## Sand Box/Tree House Play area

- ★ Please make sure children don't remove sand from sandbox
- ★ Please return all plastic toys (except trucks) to the black chest before leaving

## Giant Swing:

- ★ The giant swing can be used as just a swing or as a way to jump into the water
- ★ In order to get any height, the giant swing requires additional pushers
- ★ Swimmers & Boaters should be mindful of moving out of the way before the next swinger jumps.

## Pole Swing:

- ★ There are 3 ways to use the pole swing:
  1. Hold self-up and tuck knees up then go forward off the hill
  2. Hold higher on the rope and put a foot in the handle
  3. Run down the side of the hill so that you go in a circular pattern over the water.
- ★ Note: If running down the hill to swing around on the rope, make sure you drop so that you don't hit the pole at the end of your circle.

## Zip line:

- ★ A person must be 80 lbs. or heavier to ride the zip line alone. (The zip line needs enough weight to get it to the end)
- ★ A carabineer (Clip) MUST be attached every time you use the zip line.
- ★ If you wish to drop, you must have someone about your size, or larger, ride all the way to the end to keep the pulley from jumping the track.
- ★ If multiple people are dropping, make sure they stagger the drops to minimize the bounce and prevent pulley's from jumping the track.
- ★ Please limit the riders and droppers to about 600 lbs. at one time.
- ★ Non-swimmers need to wear life-jackets (You are welcome to use ours as long as you return them back to the poles in the tower.)
- ★ Please return all pulley's (should be 5) and straps back to the rack just inside the tower house when finished

## Other Activities Available:

- ◆ Frisbee
- ◆ Tether Ball
- ◆ Bucket golf
- ◆ Volleyball
- ◆ Playground/Kiddie Pool
- ◆ Croquet
- ◆ If you bring candy, you can use our **Candy Cannon.**
