

2004

After struggling with the white canopies for shelter, Jeff purchased several army parachutes and turned them into tents. We also stuccoed the Tower

2005

In 2005 we re-dug the pond to build the sides back up and added a mound for the pole swing.

The grass on the pole swing mound grew in quickl, and the mound made the pole swing a lot more fun.

2006

In 2006 we expanded the grass on the west bank and replaced the culvert in the road.

2007

Added tires to East bank
and put in the Giant swing

We also replaced the dock in 2007 and built the rocket launchers

2008 - Building the Pavilion

Pouring the massive 24' X 50' pad was the pavilion's first challenge

The large trusses made it possible to span the roof without poles in the middle

2009

In 2009 Jeff built a candy cannon and a cute kiddy train out of barrels
